## Renaud MARIANA

rmariana@gmail.com

Objective:

With more than 15 years experience starting designing middlewares for smartcards to large scale systems, I'm keen to exploit my knowledge further in building, testing, operate concurrent, energy efficient systems.

## **WORK EXPERIENCE**

## Santevet | Online Bookings

France - remote 11
23 - till present

## Key Responsibilities

- · Reliability: enforce software robustness of Santevet Online Booking;
- Fix several critical bugs like this one found in our dependencies, fix wrong linux settings, aws instances size, etc...) to achieve a better reliability;
- Observability: add metrics / monitoring with prometheus / promQL / grafana;
- Stripe: add a card payment method to Santevet products, migrate our stripe api;
- · work on implementing a garbage collector for our CQRS data;
- · Solving front bugs;

#### Github

- Commanded (CQRS/ES): fix an OOM bug present for years in the commanded dependency;
- Prometheus high resolution metrics: create a small memory footprint prometheus counter able to track millions of different counters, used intensively by our analytics.

#### Environment

 AWS - Postgres - Phoenix - CQRS/ES - EventStore - Commanded - ElasticSearch - Stripe API - promQL - Broadway - Rust

## **Motorola Solutions**

Glostrup, Denmark 🎏

21 - 22

## Key Responsibilities

- Devops for a cloud based telecom product that connects <u>Land Mobile Radio systems</u> over the internet:
- Reliable software programming devops (kubernetes);
- Software: write new kubernetes microservices (service-level agreement, ..) and deployed them in all regions;
  - The role included tasks like writing / running the deployment pipelines, the CI/CD integration, templates, helm chart, monitoring, logging;
- SRE tasks: implement a SLA measurement microservice, doing on-calls, running postmortem, improve reliability;

#### Environment

 Kubernetes - Helm - Docker - Elixir - Elk - Azure Pipelines - Telemetry - PagerDuty -Prometheus - Continuous Integration - Rabbitmq - Grafana - Redis - Phoenix - GraphQL.

## Kuantic | Lead

Sofia-Antipolis, France 18 - 21

# Key Responsibilities

- Fleet management Technical interface for Stellantis (customer #1);
- Development process: full refactoring of the backend stack, modernizing the erlang development process and deployments, adding Elixir to our backend;
- Reliability: improve the reliability and extensibility of the stack with for example, MQ;
- Big-data: inject our vehicles traffic in elixir pipelines for data analysis (MapReduce, SQL backend), third-party export pipelines;
- Tooling: add tools like Elastic Search and Elixir Dashboards;
- Troubleshoot some issues;
- Performance: improve overall performance with some caching;
- Side project: develop and maintain a SaaS based on Phoenix / LiveView;

## Github

- A local key-value cache;
- · A nif cache for openstreetmap.

# Environment

 $\bullet \ \ NoSQL \cdot MapReduce \cdot Erlang \cdot Distributed \ Systems \cdot RabbitMQ \cdot Broadway \cdot Elixir \cdot SQL \cdot Docker \cdot Kubernetes \cdot Phoenix \cdot Elastic Search$ 

France

#### Online SAS | R&D

#### Key Responsibilities

Paris, France

13 - 17

- Distributed cloud storage R&D Devops
- Architecture: define the basis for a fault tolerant storage (e.g. where nodes may crash);
- Implement a flexible, lightweight protocol layer (nbd) in erlang (where it shines), allowing for
  example to move geographically a customer storage while his storage is currently in use
  topics: live release upgrade, app profiling, riak LRU cache, blocks dependency graph, users
  volume live relocation, riak node crash recovery, data flow performance analysis, webmachine
  rest api;
- Implement a fraud detection system based on emergent machine learning / AI technologies.
   Made the technical decisions (scikit versus legacy), build the features and python workflow (SQLAlchemy, Rest API);
  - This AI fraud detection is used in production and is fully automated. *topics*: scikit-learn, python, SQLAlchemy, postgresql
- Online SAS san servers as <u>IOT</u> (POC) for live snapshots and statistics data collection topics: qemu-nbd, iot;
- erlang distributed testing of aws s3 storage backend topics: basho bench, tsung;

#### Github

· a spatio-temporal logger.

#### Environment

• Scikit-Learn · PostgreSQL · NoSQL · Storage Area Network (SAN) · Machine Learning · Erlang · Python - SQLAlchemy - Distributed Systems · Quickcheck · Docker · Qemu · Linux Kernel

#### Meetic, +500 people

Paris, France 10 - 13

#### Key Responsibilities

- · Distributed chat system main backend developer;
- maintainer of the messaging stack (Erlang/Ejabberd +200K simultaneous users);
- architect and code new requirements for the Meetic chat system;
- adding the js xmpp protocol (bosh) extension to the backend;
- package, benchmark, experiment new ideas in erlang;
  - develop a jabberd roster (contact) cloud storage (Riak);
  - develop a game framework as a cluster extension for Ejabberd to supports simultaneously ten of thousands of human interactions stored in Riak;
  - $\,\circ\,$  a realtime 3D supertracker to monitor fraudulent chat messages traffic;
  - benchmark RabbitMQ for messages logging;
- side project: rewrite in Erlang a C++ biological follicular/ovarian growth simulator I build (INRA, ATT/C++ coroutines), my first project in Erlang ♥;
- side projects: open-source a real-time extension for erlang, allowing to schedule hard real-time messages, illustrated with two n2o projects:
  - o an erlang multi players midi sequencer;
  - o an interactive physics simulator.

# Github

 a <u>real-time extension</u> for erlang, allowing to schedule hard real-time messages (C / libasound library / NIF).

# Consultant embedded software

Paris, France 02 - 10

## • Embedded programming - Philips / Sagem mobiles

- based on the 18Crypt profile, architect of the NXP mobileTV CAS feature (conditional access); this multi sites project involved people from the Netherlands, India and Ireland (S3);
- Feature leader of Puma phone media manager, specify & code the real-time requirements (apollo, js);
- o develop a new video player automaton in C for Sagem Mobile;
- build a host based verification system tool to ensure the middleware correctness, this tool
  uses logic programming techniques on a host to drive the tests on the embedded system;
- android devices: build a verification tool to test low level Android java hooks (thread, java fields / methods, state machines).

# • Embedded programming - Philips STB

- add multi-threading (EMM/ECM and Tuner) for the Philips STB DLI (Device Layer Interface); develop a porting layer for PVR services based on ST40 crypto security;
- as a field engineer at BYTEL for the BBOX IPTV Product, investigates Technicolor stb middleware:
- o rewrite in Erlang my massively parallel C++ coroutines simulator for a biological processus

(based on Cox Renewal Theory statistics model).

#### • DVB-H Mobile TV - Orange

- o participates to the development of next generation SIM & KDA conditional access for Orange DVB-H mobiles;
- o semi-formal testing of the sim software using logic programming techniques;
- o customize VLC to decode the rtp h264 ismacryp stream.

## • Project leader (2 patents) - Viaccess mobile drm system

- o architecture of a poc : server DVB-H mobile card , mp4 encryption schemes, licence
- o participate to the development of some parts of the project : sim, oma v2 mp4 packager, symbian software;
- o manage the relationships with major smart card suppliers, video software vendors and third party software companies.

#### CP8 Transac

Louveciennes, France July 97 - June 02

# • Project leader of Inria javacard (3 patents including 2 US)

- o did the coordination between INRIA, the mask and the CP8 R&D teams. This project included a virtual machine simulator along other tools like secure loader or bytecode optimization programs and benchmarks suite software;
- o R&D: lot of javabytecode optimizations;
- o replace old proprietary VB tools with the http interface access (one patent) for smartcards;
- o technical consultancy for a French bank (Caisse d'Epargne, B0' application);

# Secure protocols for e-commerce, Carte Bleue

- o port of the french banking protocol (B0') in javacard;
- o add multi-threading for the SimToolkit (3 patents filled);
- $\circ\,$  proof of concept of a sms-based E-purse transaction system ( Proton smartcard and
- $\circ\,$  open-source the prolog PC/SC interface, used to run semi formal tests in logic programming.

#### **EDUCATION**

# **Groupe Ecoles Centrales**

Centrale Méditerranée, France

- Graduated in Computer Engineering Minor: Industrial IT and embedded systems
- Competitive classes preparing to the best engineering schools ("Les grandes Ecoles")

# **Computer Skills**

kubernetes / helm / docker, azure pipelines, low latency Erlang/OTP, elixir Systems:

> ecosystem, phoenix, tailwind-css, github actions, riak (nosql), linux kernel (bloc storage), graphQL, sqlite, postgresql, SQLAlchemy, tsung, redis, C++

Coroutines.

Observability - Prediction : PromQL - Grafana - Scikit-Learn - High resolution metrics counters.

Programming languages: erlang / elixir, C/C++, Python, JavaScript prototype, java-bytecode, SQL, ... Methodology:

jira, git, github, CI/CD, OTP, Rational Unified Process (RUP, UML), Microsoft

Project.

Protocols: nbd, aws, xmpp, iptv, TR-069, mpeg-4 streaming (RFC 3984), ISMACryp

1.0. Etsi-Tetra.

Embedded: Linux, Nucleus, RTKI, VME, JavaCard, Android.

Smart Cards: EMV, SIM Card, B0' Banking Application, E-Purse, OpenPlatform.

## **Projects**

Prometheus: Create a small memory footprint telemetry\_metrics\_prometheus\_core

counter able to track millions of different counters.

LiveView based SaaS: Develop and maintain a SaaS based on Phoenix / LiveView / live SVG.

Superls: A multi volumes, files tokenizer, indexer and search engine.

Caching systems: Small libraries on top of a NOSQL database.

Spatio-temporal logger: A tiny library to debug concurrency in distributed systems, both in time and

Hardware clock: ALSA hardware based clock (NIF) for real-time message processing.

Ejabberd Game framework: Framework for multi players games on top of Riak and Ejabberd.
